

For CBSE classes
7th - 10th

"Buoyancy with its innovative and structured program aims to deliver the buoyant force to your child's career to excel in this competitive world."

WHAT IS BUOYANCY

- 1 Buoyancy education is founded on the idea of complementing the school education-the **"Buoyant Force"**.
- 2 We provide a wholesome and complete knowledge base to our students to prepare them to succeed everywhere.
- 3 The Buoyancy program is designed to impart learning in lucid, yet comprehensive manner.
- 4 We help your child to score more at school and also prepare them to be winners at every step of their professional lives.
- 5 The various tools that are required to be a winner in life-the **"Buoyant force"** needed to embark on a successful career is imparted here at Buoyancy.

WHY CHOOSE BUOYANCY

1. We help you score better at school & choose the right career.
2. Scientifically designed classroom programs.
3. Expert faculty for :
 - Classes VII-X : English, Mathematics, Science & Social Science.
4. Score Enhancer for class VII-X :
 - Lucid teaching techniques, fun handouts, innovative testing techniques etc.
5. Provision for Extra Classes & Doubt sessions.

The "Buoyant Force"

With the countless competitive exams, group discussion rounds and interviews a student takes to get started with his professional life, the preparation always lags behind. What actually no child is taught, is to pick his own challenge, plan an attack plan and persevere till fruit of his labor lands in his lap.

We at Buoyancy want our student learn exactly this along with doing good in school.

How would we achieve that along with teaching the school curriculum :

A. Know the world around you :

A fortnightly session where students are made to discuss the happenings in the country and the world around in a detailed and analytic manner. ah! This will help the students all through their career-the competitive exams (CAT, UPSC, SSC and many more), the group discussion rounds, the interviews all require the student to have an extensive knowledge of the world happenings.

B. Workshops and seminars :

Industry experts and motivational speakers will deliver talks and conduct workshops to open to the students a whole new world of opportunities. The industry experts from areas such as nano-technology, robotics, augmented reality, architecture etc. will divulge all the information that the students need to know to select the perfect careers for themselves.

What To Expect from Buoyancy

1 Score Enhancer program

Worksheets, assignments, quizzes and tests all designed to impart and test conceptual knowledge of the student.

2 Weekly Tests

Tests structured to test the if the student has acquired a complete understanding of the concepts, followed by discussion classes to inculcate the technique to write better answers.

3 PTMs

We believe in progress and more so in encouraging a healthy student-parent-teacher relationship with the focus on the student's progress graph.

4 The "Buoyant force"

This program is designed to impart confidence to the student to make a mark in this competitive world. Our student will be able to plan ahead and execute it. In short, students from Buoyancy will fabulous out in the world.

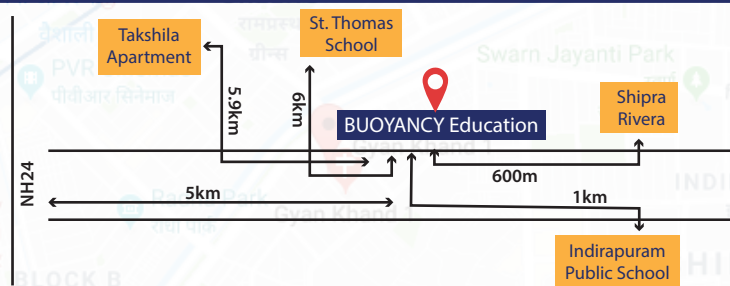

Ethics, Values & Objective Oriented approach that defines us

- Our vision is to make our students independent, self-sufficient and responsible enough to take on any challenge that life throws at them.
- Our students shall be well-equipped with all the tools to take on any competitive exam or interview that they would wish to clear in their careers ahead.
- Our students will know how to recognize an opportunity, interpret it, plan accordingly and cease it.
- Our students are encouraged to speak up, hold debates, discuss topics subjectively in the classroom.
- Our students believe in the values of discipline, planning ahead and perseverance
- Our students will be ready to start their quest to make a mark in the world.
